Private IP address
The private IP address with which to associate the Elastic IP address.
172.31.10.116

Reassociation
Specify whether the Elastic IP address can be reassociated with a different resource if it already associated with a resource.

Warning: If you associate an Elastic IP address with an instance that already has an Elastic IP address associated, the previously associated Elastic IP address will be disassociated, but the address will still be allocated to your account. [Learn more](#)

If no private IP address is specified, the Elastic IP address will be associated with the primary private IP address.

Step 4: Check the Instance IP has been changed as same as the newly created Elastic IP.
